EDUCATION

Premier University, Chattogram **2020 - 2024**
Bachelor of Science (B.Sc.) - Computer Science and Engineering; CGPA: 3.66 out of 4

SKILLS SUMMARY

- **Programming Languages**: Python, C
- **Software Testing**: Manual Testing, API Testing (Postman), Playwright (Basic), Scrum Framework, JIRA, ClickUp
- **Software Development**: Familiar with HTML, CSS, JavaScript, Bootstrap, React, Node.js, MySQL, SQL, RDBMS concepts
- **Version Control**: Git, GitHub
- **Microsoft Office Suite**: Word, PowerPoint, Excel
- **Soft Skills**: Attention to Detail, Analytical Thinking, Communication, Problem Solving
- **Language Skills**: English (IELTS 6.5), Bengali (Native)

PROFESSIONAL EXPERIENCE

SQA and Documentation Trainee **December 2025 – October 2026**
Premier University, Chattogram, Bangladesh

- Performed functional and API testing for ongoing software development projects at the university
- Tested frontend workflows and verified UI data against backend API responses
- Reported and tracked defects using ClickUp and collaborated with developers by defining expected behavior, suggesting UI/UX improvements, and proposing feature enhancements to improve usability
- Created documentation and tutorial videos to guide users in using newly deployed institutional digital services

PROJECTS

Software Testing | API Testing | API Testing with Postman & Newman | PROJECT LINK | API DOCUMENTATION LINK

- Designed and implemented comprehensive API test cases for a mock student management system using Postman
- Performed CRUD operations with detailed assertions for status codes, headers, response time, and schema validation
- Utilized data-driven testing via CSV input and dynamic environment variables to chain requests (create → update → delete)
- Automated test runs using Newman CLI and generated HTML reports for result visualization
- Published interactive API documentation via Postman's Documenter
- Set up and managed a mock REST API using json-server

Software Testing | Manual Testing | Student Enrollment Management System | PROJECT LINK | CODE LINK | OUTPUT LINK

- Created test scenarios for both Admin and Student panels, covering all the functionalities of the Student Enrollment Management System (code and output links provided)
- Developed test cases, RTM, test execution results, and bug reports for the registration functionality of the admin panel

Software Testing | Scrum Workflow Implementation Using Jira | VIDEO LINK

- Performed Agile Scrum activities using Jira
- Created a project and added users to the project
- Defined backlog, created epics, and user stories with assigned story points
- Managed sprints: added user stories, started the sprint, and created sub-tasks
- Demonstrated the sprint lifecycle by moving stories through Scrum board states: To Do, In Progress, and Done

Software Development | Student Enrollment Management System | CODE LINK | OUTPUT LINK

- Created a Student Enrollment Management System using HTML, CSS, PHP, SQL, and MySQL
- Utilized XAMPP server to manage backend operations and database connectivity

Software Development | Store Report Generator App | LINK

- Developed a full-stack application using HTML, CSS, JavaScript, React, Node.js, and MySQL
- Utilized an API to fetch data and store it in a MySQL database
- Implemented a feature to generate reports listing top purchasers by total amount spent

EXTRACURRICULAR ACTIVITIES

HackerRank PROBLEM SOLVING RATING | LINK

- Achieved 5 stars and earned 879.33 points

ICPC ASIA DHAKA REGIONAL SITE ONLINE PRELIMINARY CONTEST | LINK **2021**

- Team name: PUC_Bipolar (Rank: 843)

ADA LOVELACE NGPC 2022 | LINK **2022**

- Team name: PUC_Bipolar (Rank: 117)
